

Bankers Medicare Supplemental Insurance Now Offering Electronic Payment & Electronic Explanation of Benefits

December 20, 2017

Bankers has now partnered with JP Morgan to utilize the Healthcare LinkSM. The Healthcare LinkSM is JP Morgan Chase's easy-to-use, convenient web-based solution that enhances providers' ability to access key information about processed claims, manage claims payments, improve fraud control, and substantially reduce paper-based administrative costs.

This convenient, web-based program offers two key benefits:

- ⇒ Electronic delivery of provider payments
- ⇒ Electronic delivery of Record of Payment (ROP-also referred to as EOBs)

Some features of the Healthcare Link include:

- ⇒ Providers can sign up to receive payments through Electronic Funds Transfer (EFT). EFT payments are sent directly to the provider's bank account on a weekly basis and will replace a bulk check
- ⇒ It allows authorized users immediate access to key information about their processed claims, such as remittance details and payment status.
- ⇒ The assigned claim benefits will be disbursed directly into the provider bank account.
- ⇒ The provider has control of their account and settings.

The attachment below contains the enrollment form, frequently asked questions and additional requirements.

Enrollment Form

If you would like to enroll for EFT electronically, log in to the provider website below and click the EFT Enrollment link in the Navigation bar.
