

NGSConnex: Part B Claim Submission-Copy Claim

April 13, 2018

Do you currently submit Part B claims through NGSConnex? If so, did you know you have the ability to copy a previously submitted claim for the same beneficiary.

When you select the "Copy Claim" button, NGSConnex will create a copy of the previously submitted - accepted claim. **You are required to change the date of service to avoid duplicate claim submissions resulting in a denial.** You also have the ability to change any other fields (submitted amount, CPT codes, number of units, modifiers, etc.) so please review all information and make any applicable changes.

NGS encourages you to review *Enhancement for Providers who Submit Part B Claims through NGSConnex* article to learn more about this exciting feature.
