

# Now Available! NGSConnex MBI Lookup Tool

May 22, 2018

On 4/2/2018, CMS started mailing new Medicare cards with the Medicare Beneficiary Identifier (MBI) to all people with Medicare and will continue to mail new Medicare cards in phases by geographic location. This means that some of your patients may have already received their new Medicare card containing the MBI.

If you are currently registered with NGSConnex, their secure internet portal will allow you to login and use the MBI Lookup Tool to obtain your patient's MBI, if CMS has mailed them their new Medicare card. To use this new self-service tool in NGSConnex, you will be required to validate using reCaptcha software and also you will need to enter the following search criteria:

- Patient Last Name
- Patient First Name
- Patient Date of Birth
- Patient Social Security Number
- NPI
